

Environment and Climate Policy

Asian Phytochemicals Public Company Limited is committed to sustainable business operations based on environmental responsibility. By recognizing and giving importance to minimizing environmental impacts from its business operations, products and services, the Company has formulated a policy to develop manufacturing processes and create innovation in order to minimize environmental impacts which may occur with the goal to use natural resources wisely, reduce the use of limited natural energy, contribute to solving climate change problems, promoting green spaces, and efficient water management, including protecting the ecosystem and biodiversity. The Company, therefore, sets policies as guidelines for directors, executives and employees to participate in environmental activities as follows:

1. Conduct the business in compliance with regulatory requirements, local regulations and various measures related to the environment.
2. Conduct business with the least impact on the environment. and establishes the efficient use of natural resources, energy conservation, greenhouse gas emission reduction, waste management, and environmental impact reduction as part of the company's operations.
3. Raise awareness among all employees about sustainable practices (Sustainable) of the company to instill and create awareness in jointly managing environmental impacts and conserving the environment together with in the form of reducing the amount of use reuse and support the restoration of natural resources.
4. Support the purchasing process procurement of environmentally friendly products and services.
5. Announce and communicate this policy through appropriate processes, create knowledge and awareness of environmental stewardship and energy conservation among employees, customers, partners and relevant stakeholders and encourage participation in actions to reduce negative environmental and climate impacts.

This policy is effective from January 1, 2023.
